LABOUR BUREAU
CHANDIGARH

Foreword

India has the world's largest youth population despite having a smaller population than China as per the recent UN report. The youth population has an important role to play as potential demographic dividend by constituting skilled stock of human capital. However, the magnitude of this benefit depends on the ability of the economy to absorb and productively employ the extra workers rather than be a pure demographic gift. In recognition of the importance of investing in young people, several steps have been taken by Govt. of India.

In the Third Annual Employment–Unemployment Survey 2012-13, Labour Bureau compiled a report aimed at providing some authentic source of the youth employment-unemployment characteristics in India. Under the Fourth Annual Employment–Unemployment Survey also, an attempt has been made to assess the Youth Employment–Unemployment Scenario based on broad activity by educational qualification and kind of activities the youth is pursuing in the country for various age groups viz. 15-17 years, 18-29 years and 30 years and above by Gender/Sector/State/UT wise.

I hope the present report will prove to be an important input for the policymakers to draft/review the policies particularly related to the youth so that the demographic dividend which our country has is transmitted into economic and social prosperity.

EXECUTIVE SUMMARY

- The present report is based on the Fourth Annual Employment-Unemployment Survey 2013-14 conducted by the Labour Bureau.
- The current volume deals with the "Youth Employment-Unemployment Scenario 2013-2014" in the country.
- The survey has been conducted in all the States/UTs by covering all the districts.
- The field work executed from January, 2014 to June, 2014 in majority of the States/UTs.
- A total sample of 1,36,395 households have been covered with a breakup of 83,385 households in the rural sector and 53,010 households in the urban sector.
- The labour force estimates for specific age groups representing "Youth" viz. 15-17 years, 18-29 years and 30 years and above have been derived based on two approaches. The two approaches are Usual Principal Status (UPS) Approach and Usual Principal and Subsidiary Status (UPSS) Approach.
- Majority of the labour force related tables generated in the report are state-wise/gender-wise/sector-wise.
- Based on the survey results, Labour Force Participation Rate (LFPR) is estimated at 49 per cent for the age group 18-29 years based on Usual Principal Status Approach at All India level.
- Labour Force Participation Rate for different age groups and by two different approaches is as follows:

(in per cent)

Approach	15-17 Years	18-29 Years	30 Years & above
UPS	10.7	49.0	59.7
UPSS	14.1	52.0	62.8

- Worker Population Ratio is estimated at 42.7 per cent for the age group 18-29 years based on Usual Principal Status Approach at All India level.
- Worker Population Ratio for different age groups and by two different approaches is as follows:

(in per cent)

Approach	15-17 Years	18-29 Years	30 Years & above
UPS	8.8	42.7	58.8
UPSS	12.7	47.1	62.3

- The Unemployment Rate for the age group 18-29 years is estimated at 12.9 per cent at All India level based on Usual Principal Status Approach.
- Unemployment Rate for different age groups and by two different approaches is as follows:

(in per cent)

Approach	15-17 Years	18-29 Years	30 Years & above
UPS	17.5	12.9	1.4
UPSS	10.2	9.4	0.8

- Based on the survey results, majority of the persons employed are either self-employed or casual worker for the age group 18-29 years.
- Based on Usual Principal Status Approach, 41.9 percent employed persons are self-employed followed by 34.9 percent as casual worker and the remaining 23.1 percent as wage/salaried employee and contract category worker for the age group 18-29 years.
- The survey results show that with the increase in education level, the unemployment rate is also increasing for the age groups 18-29 years.
- The Unemployment Rate for the persons aged 18-29 years and holding a degree in graduation and above is found to be maximum with 28 per cent based on Usual Principal Status Approach at All India level.
- The Unemployment Rate for the persons aged 18-29 years and having educational qualification "below primary" and "primary" is about 4 per cent based on Usual Principal Status Approach at All India level.

CHAPTER-I

Employment-Unemployment Scenario for Youth

Introduction

1.1 “Youth” is best understood as a period of transition from the dependence of childhood to adulthood’s independence. Youth is a more fluid category than a fixed age-group. However, age is the easiest way to define this group, particularly in relation to employment. Therefore “youth” is often indicated as a person between the age where he/she may leave compulsory education, and the age at which he/she finds his/her first employment. This latter age limit has been increasing, as higher levels of unemployment puts many young people into a prolonged period of dependency. The results in the report are compiled for different age groups viz. 15-17 years, 18-29 years and 30 years and above, keeping in view the requirements of various users/stakeholders. The concepts and definitions for measuring various labour force parameters by different

approaches are enclosed in Annexure I.

Labour Force Participation Rate (LFPR)

1.2 Labour Force Participation Rate indicates the supply of labour and is an important input for production of goods and services. In simple words, Labour Force Participation Rate is the proportion of the working age population that engages actively in the labour market, either by working or seeking for work. It provides an indication of the relative size of the supply of labour available which can be engaged in the production of goods and services. In this volume, the results are compiled for different age groups namely 15-17 years, 18-29 years and 30 years and above by Gender/Sector/State/UT wise based on Usual Principal Status Approach and Usual Principal & Subsidiary Status Approach.

Table 1.1: LFPR for different age groups by different approaches (in %)

Approach	15-17 Years			18-29 Years			30 Years & above		
	M	F	P	M	F	P	M	F	P
UPS	13.8	6.1	10.7	68.7	24.5	49.0	86.0	28.7	59.7
UPSS	16.9	10.0	14.1	70.1	29.4	52.0	86.9	34.4	62.8

Figure 1: LFPR for different age groups by different approaches (in %)

1.3 At All India level, the Labour Force Participation Rate for the age group 18-29 is 49 per cent based on Usual Principal Status Approach. In case of male category, the LFPR is estimated to be 68.7 per cent whereas in case of female category, it is 24.5 per cent based on Usual Principal Status Approach. As evident from the table, based on Usual Principal & Status Approach, the

LFPR for male category is 70.1 per cent whereas for females, it is 29.4 per cent for the age group 18-29 years at All India level.

1.4 In case of age group 15-17 years, the Labour Force Participation Rate is estimated to be 10.7 per cent based on Usual Principal Status Approach at All India level. In case of male category, it is 13.8 per cent

whereas for female, the same is 6.1 per cent. Based on Usual Principal & Subsidiary Status Approach, LFPR for the age group 15-17 years is estimated to be 14.1 per cent at All India level.

Worker Population Ratio (WPR)

1.5 The second important parameter in the labour force

survey is the Worker Population Ratio which signifies the proportion of workers/employed persons in the total population of specific age group. Based on Usual Principal Status Approach and Usual Principal & Subsidiary Status Approach, the worker population ratio for different age groups is as follows:

Table 1.2: WPR for different age groups by different approaches (in%)

Approach	15-17 Years			18-29 Years			30 Years & above		
	M	F	P	M	F	P	M	F	P
UPS	11.6	4.8	8.8	60.9	20.1	42.7	85.3	27.8	58.8
UPSS	15.2	9.0	12.7	64.3	25.8	47.1	86.5	33.8	62.3

Figure 2: WPR for different age groups by different approaches (in %)

1.6 At All India level, the Worker Population Ratio for the age group 18-29 is estimated at 42.7 per cent based on Usual Principal Status Approach. In case of male category, it is 60.9 per cent whereas for female category, the Worker Population Ratio is estimated at 20.1 per cent. Based on Usual Principal & Subsidiary Status Approach, the Worker Population Ratio is estimated at 47.1 per cent for the age group 18-29 years at All India level. For male category of persons, the WPR is 64.3 per cent whereas for

female category, it is 25.8 per cent.

Unemployment Rate (UR)

1.7 The third important parameter studied under the Labour Force Survey is the unemployment rate. The unemployment rate signifies the proportion of persons who were available for work but did not get work during the reference period. Based on the two approaches the unemployment rate for different age groups is as follows.

Table 1.3: UR for different age groups by different approaches (in %)

Approach	15-17 Years			18-29 Years			30 Years & above		
	M	F	P	M	F	P	M	F	P
UPS	16.4	21.3	17.5	11.3	18.2	12.9	0.9	3.1	1.4
UPSS	10.2	10.1	10.2	8.4	12.4	9.4	0.5	1.6	0.8

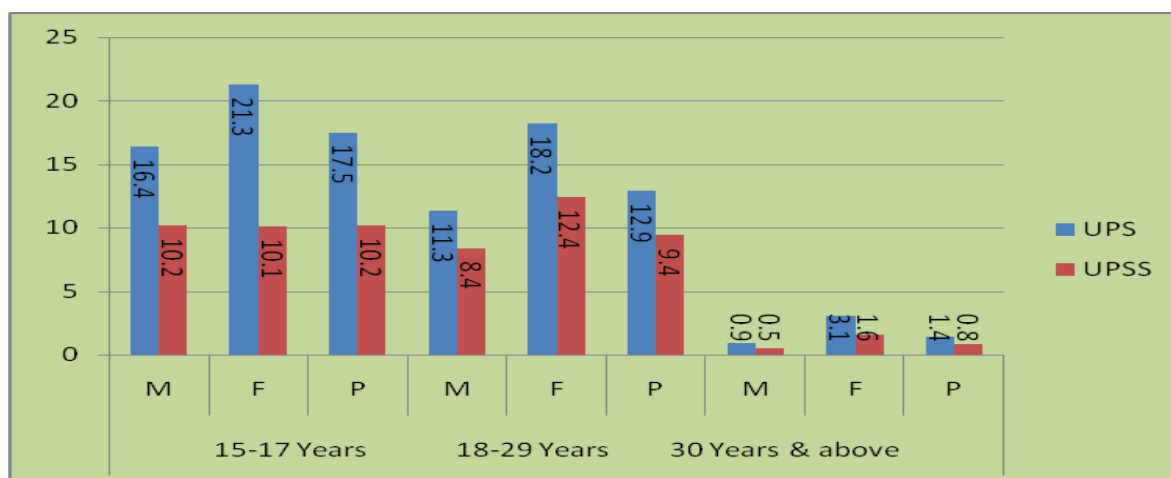

Figure 3: UR for different age groups by different approaches (in %)

1.8 Based on the Usual Principal Status Approach, the unemployment rate at All India level is estimated at 12.9 per cent for the age group 18-29 years. In case of male category of persons, the unemployment rate is estimated at 11.3 per cent whereas for female category, it is 18.2 per cent for the age group 18-29 years.

1.9 Based on Usual Principal & Subsidiary Status Approach, the unemployment rate is estimated at 9.4 per cent for the age group 18-29 years at All India level. While comparing gender wise unemployment rate, for male category of persons, it is 8.4 per cent, whereas for female category, the same is 12.4 per cent at All India level.

Table 1.4: LFPR for different age groups by different approaches (in %)

Approach	18-29 Years					
	LFPR		WPR		UR	
	Third	Fourth	Third	Fourth	Third	Fourth
UPS	47.3	49.0	41.2	42.7	13.0	12.9
UPSS	49.4	52.0	44.0	47.1	11.3	9.4

1.10 At All India level, the LFPR and WPR for the age group 18-29 have increased slightly under fourth EUS. During the fourth round, LFPR and WPR is estimated at 49.0 and 42.7 per cent whereas it was 47.3 and 41.2 per cent respectively under the third EUS based on UPS approach. Based on UPS approach, the Unemployment Rate has remained almost similar 12.9 per cent as against 13 per cent under the third EUS. In case

of UPSS, LFPR is estimated to be 52.0 per cent in fourth EUS whereas under third EUS, it was 49.4 per cent.

Activity Wise Distribution of Employed Persons

1.11 The employed persons are further classified based on the activity pursued by them during the reference period. Based on economic activities pursued by the employed persons in different reference periods, the persons

aged 15-17 years, 18-29 years and 30 years & above are broadly classified as Self Employed, Wage/Salaried Worker, Contract Workers and Casual Labourers. Under the Usual Principal Status Approach, the main economic activities pursued by the persons are classified as follows:

i) worked in household enterprise as an own account worker;

- ii) worked in household enterprise as an employer;
- iii) worked as helper in household enterprise (unpaid family worker);
- iv) worked as regular salaried/wage employee;
- v) worked as contract worker;
- vi) worked as casual wage labour in public works;

Table 1.5: Activity Wise distribution of workers by different age groups (in %)

Head	15-17 Years			18-29 Years			30 Years & above		
	R	U	R+U	R	U	R+U	R	U	R+U
Self Employed	44.3	36.2	43	44.5	34.4	41.9	55.9	42.6	52.3
Wage/ Salaried employee	5.3	16.9	7.0	12.9	35.6	18.6	9.3	34	15.9
Contract Worker	2.2	5.1	2.6	3.8	6.6	4.5	2.0	4.0	2.5
Casual Worker	48.3	41.8	47.3	38.8	23.4	34.9	32.9	19.3	29.2

R-Rural; U-Urban

Figure 4: Activity Wise distribution of workers by different age groups (in %)

1.12 It may be seen from the above table that majority of the persons are either self-employed or casual worker for all the age groups. While analyzing the results under 18-29 years of age group, it is evident that 41.9 per cent are self-employed followed by 34.9 per cent as casual workers, 18.6 per cent under wage/salaried employee category and remaining 4.5 percent under the contract worker classification at All India level (or Rural+ Urban).

1.13 While analyzing the results at sector level, it may be seen that in urban sector wage/salaried employees are maximum with

35.6 percent followed by 34.4 persons under the self-employed classification, 23.4 percent under the casual worker category and remaining 6.6 percent under the contract worker category at All India level for the age group of 18-29 years.

Distribution of persons based on National Industrial Classification 2008

1.14 The employed persons for various age groups compiled in the report are further classified based on NIC 2008 classification at one digit level. The following sections are merged to present the results at one digit level.

Section	Details	Code
Section A	Agriculture, forestry and fishing	Code 1
Section B	Mining and quarrying	Code 2
Section C	Manufacturing	Code 3
Section D	Electricity, gas, steam and air conditioning supply	Code 4
Section E	Water supply; sewerage, waste management and remediation activities	Code 4
Section F	Construction	Code 5
Section G	Wholesale and retail trade; repair of motor vehicles and motorcycles	Code 6

Section H	Transportation and storage	Code 6
Section I	Accommodation and Food service activities	Code 6
Section J	Information and communication	Code 6
Section K	Financial and insurance activities	Code 7
Section L	Real estate activities	Code 7
Section M	Professional, scientific and technical activities	Code 7
Section N	Administrative and support service activities	Code 7
Section O	Public administration and defence; compulsory social security	Code 8
Section P	Education	Code 8
Section Q	Human health and social work activities	Code 8
Section R	Arts, entertainment and recreation	Code 8
Section S	Other service activities	Code 8
Section T	Activities of households as employers; undifferentiated goods and services producing activities of households for own use	Code 9
Section U	Activities of extraterritorial organizations and bodies	Code 9

1.15 The survey results are compiled for the age group of 15-17 years, 18-29 years and 30 years and above. Based on the survey findings, majority of the persons are employed under the Code1 classification or Agriculture, forestry and fishing section based on Usual Principal Status Approach in all the age groups.

1.16 It may be observed from the above table that in all the three age groups, a maximum number of persons are found to be employed under Agriculture, forestry & fishing sector. In construction, manufacturing, whole sale and Retail Trade sectors, significant number of persons are found to be employed based on the survey results under the usual principal status approach.

Table 1.6: Distribution of workers by NIC 2008 based on Usual Principal Status Approach by different age groups (in %)

Rural +Urban

Code	15-17 Years	18-29 Years	30 Years & above
Code1	52.6	38.5	48.5
Code2	0.9	0.9	1.0
Code3	14.7	13.9	9.7
Code4	0.4	0.6	0.7
Code5	16.7	14.7	10
Code6	10.2	18.5	16.5
Code7	0.6	4.0	4.2
Code8	3.0	8.4	8.9
Code9	1.0	0.5	0.7

Figure 5: Distribution of workers by NIC 2008 based on UPS Approach by different age groups (in %)

Education Wise classification of persons

1.17 In the report, persons aged 18-19 years are also classified by educational level vs. main activity pursued by them during the reference period viz. employed,

unemployed and not in labour force for different age groups. These tables are generated for rural + urban, rural and urban category for all the States/UTs/All India level for different age groups.

Table 1.7: Distribution of persons by educational classification based on Usual Principal Status Approach for the age group 18-29 years (in %)

Educational Classification	Employed	Un-employed	Not in labour force
Not Literate	50.3	1.8	47.9
Below Primary	50.9	2.1	47.0
Primary	56.2	2.3	41.5
Middle/Secondary/Higher Secondary	40.5	4.7	54.8
Diploma/Certificate	32.3	9.3	58.4
Graduate & above	40.4	15.6	44.0

1.18 The results are compiled for not literate, below primary, primary, middle/secondary/higher secondary, diploma/certificate and graduate & above classification. It may be seen from the table that as the education level rises, the unemployment rate is also

increasing. In case of graduates & above, the unemployment rate is estimated at 28 per cent for the age group 18-29 years. In case of less educated persons like not literate, below primary and primary persons aged 18-29 years, the unemployment rate is estimated at less than 4 per cent.

CONCEPTS AND DEFINITIONS

Important concepts and definitions used in the survey and relevant to this report are explained below.

1.1 House: Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

1.2 Household: A group of persons normally living together and taking food from a common kitchen constitutes a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family if the period of stay is six month or above.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere like in hostel for studies or for any other reason for major part of the year, he/she will not be considered as a member of his/her parents household.

1.3 Household size: The number of members normally residing in a household is its size.

1.4 Economic activity: The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets.

1.5 Thus the term 'economic activity' under the fourth Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production

of goods and services for exchange,

- ii. Of the non-market activities,
 - a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
 - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

1.6 Activity status: It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the

following three statuses during a reference period:

- i. Working or engaged in economic activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

1.7 Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts (i) employed and unemployed.

1.8 The three broad activity statuses have been further subdivided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
 - a) worked as an own-account worker (self-employed);
 - b) employer (self-employed);
 - c) worked in household enterprise as 'helper' (unpaid family worker);

d) worked as regular salaried/wage employee other than contract worker;

e) worked as contract worker;

f) worked as casual wage labour in public works;

g) worked as casual wage labour in other types of works;

- ii. not working but seeking or available for work (unemployed);

- iii. neither working nor available for work (not in labour force)

- i) attended educational institution;

- ii) attended domestic duties;

- iii) recipients of rent, pension, remittance, etc;

- iv) not able to work due to disability;

- v) Others (prostitutes, beggars, etc.);

1.9 The various concepts like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

1.10 Workers (or employed):

Persons who during the reference period are engaged in any economic activity or who, despite their attachment to their economic activity, have temporarily abstained from work, for reasons of illness, injury or other physical

disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

1.11 Seeking or available for work (or unemployed): Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

1.12 Labour force: Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

1.13 Out of labour force: Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of

the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

1.14 It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

1.15 Self-employed: Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e. regarding market, scale of operation and money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their

remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

1.16 The self-employed persons may again be categorized into the following groups:

- i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour are called as own account workers. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.
- iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive

any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

1.17 Regular salaried/wage employee other than contract workers: Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time-rate wage but also persons receiving piece-rate wage or salary and paid apprentices, both full time and part-time.

1.18 Worked on contract basis: As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. For the purpose

of present survey, in addition to the above mentioned category of workers, the term contract workers includes workers whose work are governed by a contract agreement either in writing or oral directly by the establishment. More precisely, the workers hired by the establishment directly for a specific job and for a specified period will also be categorized under the contract category of workers.

1.19 Casual wage labour: A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

1.20 Different approaches for determining activity status: The persons surveyed can be classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. There could be three reference periods viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three reference periods, three different measures of activity status are arrived at. These are termed respectively as usual principal status, current weekly status and current daily status. The activity status determined on the basis of a reference period of one year is known as the usual principal activity status of the person, that determined on the basis of a reference period of 1 week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of a reference period of one day is known as the current daily status (CDS) of the person. In this report, the labour force related parameters are estimated for a reference period of one year.

1.21 Usual activity status: The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The

activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

1.22 For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period in the labour force. Within the broad activity

status so determined, the detailed activity status category of a person pursuing more than one such activity will be determined again on the basis of the relatively longer time spent.

1.23 Subsidiary economic

activity status: A person whose usual principal status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion.

SAMPLING DESIGN & ESTIMATION PROCEDURE

Introduction

Labour Bureau has been entrusted with the task of conducting Annual Employment-Unemployment Surveys in the country. The objective of this annual survey is to regularly make available the basic inputs on labour force related parameters to facilitate policy formulation/review. The first such Annual Household Employment-Unemployment survey for the period 2009-10 was conducted during the year 2010. Till so far three such surveys have been conducted and thereon reports released. The present one is the Fourth Annual Employment-Unemployment Survey in the series.

2.4 In the current survey, a moving reference period is used to determine the usual status activity of the persons. The survey has been conducted in all the States/UTs by covering all the districts in the country. The field work of the present survey was launched in January, 2014 and completed in majority of the States/UTs by June, 2014. A

sample of about 1.36 lakh household schedules has been covered during the survey in 36 States/UTs.

2.5 Sample Design: A stratified multi-stage sample design has been adopted for the Fourth Annual Household Employment-Unemployment Survey. The first stage units (FSU) for rural sector are the 2011 census villages in all the States/UTs, except Kerala State, where panchayat wards are the FSUs. In case of urban sector, the latest available Urban Frame Survey (UFS) blocks for the period 2007-12 prepared by National Sample Survey Office are the First stage units.

2.6 Stratification: Each district of a State/UT has been divided into two strata: i) rural stratum comprising of all the rural areas of the district and ii) urban stratum comprising of all the urban areas of the district.

2.7 Sample Size: In all 36 States/UTs, a total sample of

12598 First Stage Units (FSUs) is allocated at All India level keeping in view the resource availability and other logistics. Broadly considering the population proportion, a sample of 7270 FSUs is allocated to rural sector in all the 36 States/UTs, while rest 5328 FSUs are allocated in the urban sector. While allocating the sample, additional weight age is given to the urban sector as compared to rural sector; so that the urban areas are not under represented in the survey on the basis of proportional allocation, with the condition that in major states the total sample size in urban sector does not exceed that of the rural sector.

2.8 Allocation of Sample to States/UTs: Distribution of total number of sample FSUs in rural sector among the States/UTs is done in proportion to their respective rural population as per 2011 census, subject to a minimum sample allocation to each State/UT. For urban sector, the sample FSUs are allocated among the 36 States/UTs in proportion to the UFS blocks for the period 2007-12. A minimum sample size in a State/UT is allocated at 16 FSUs with a

minimum of 8 each in rural and urban areas.

2.9 Allocation of State/UT level rural and Urban Stratum sample to districts: The State/UT level rural/ urban sample is further distributed among its districts in proportion to rural/ urban population/urban frame survey blocks. A minimum of 16 FSUs are allocated to each State/UT for rural and urban areas combined. Stratum level sample is adjusted to multiple of 4 FSUs with a minimum sample size of 4 FSUs in a stratum. In case of some North Eastern States and UTs a marginal increase in sample size is done due to their under representation in overall sample because of their lower population.

2.10 Selection of FSUs: For the rural stratum, the village lists based on 2011 census frame are taken in the same order and the required sample is drawn by using circular systematic sampling technique with probability proportional to size (size being the population of the village as per Census 2011). In case of urban stratum, the UFS blocks are arranged in ascending order based on the town variable. After

arranging UFS blocks, sample is drawn by circular systematic sampling. This arrangement is done to ensure that most of the towns are represented in the sample. In both, the rural and the urban strata, samples are drawn in the form of two independent sub-samples.

2.11 Criteria for hamlet group/sub block formation: Large FSUs having approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups'(hg) in the rural sector and 'sub-blocks'(sb) in the urban sector as stated below.

Approximate present population of the sample village/ urban block	No. of hg/sb to be formed (d)
Less than 1200 (no hamlet-group/sub block)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

2.12 For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except Dehradun plains, Nainital Plains, Haridwar and Udham Singh Nagar), Poonch, Rajouri,

Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu & Kashmir and Idukki district of Kerala, the number of hamlet groups are formed as follows:

Approximate present population of the sample village/ block	No. of hgs/ sbs to be formed (d)
Less than 600 (no hamlet-groups/sub blocks)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

2.13 Selection of hamlet groups/sub blocks:

In case of large village/UFS block wherever hamlet-groups/sub-blocks have been formed, two hamlet-groups/sub-blocks are selected. The procedure to select the hg/sb is as follows:

- i) The hg/sb with maximum percentage share of population will always be selected and termed as hg/sb 1.
- ii) Second hg/sb will be selected from the remaining hgs/sbs by simple random sampling and termed as hg/sb 2.

Listing and selection of the households will be done independently in the two selected hamlet-groups/sub-blocks. In case hamlet-groups/sub-blocks is formed in a sample FSU, it is ensured that the hamlet-groups/sub-blocks formed are clearly identifiable in terms of physical landmarks. The FSU without hg/sb formation will be treated as sample hg/sb number 1.

2.14 Listing of households: After determining the hamlet-groups/sub-blocks i.e. areas to be considered for listing, all the

households in that area will be listed (including those found to be temporarily locked after ascertaining the temporariness of locking of households through local people). The hamlet-group/sub-block with sample hg/sb number 1 will be listed first and that with sample hg/sb number 2 will be listed next.

Formation of Second Stage Strata and allocation of households:

2.15 For canvassing the schedules, all the households listed in selected FSU/ hamlet-groups/ sub-blocks are to be stratified into four second stage strata (SSS) as given below:

The second-stage-strata in the rural and urban stratum will be formed based on the number of persons in a household aged 15 years and above. The four second-stage-strata (SSS) in the rural and urban strata are formed in the following order:

2.16 Allocation of households:

The number of households to be surveyed (h) in each second stage stratum in the sample FSUs is as follows:

Second Stage Strata (SSS)	No. of members in the household aged 15 years & above
SSS1	1
SSS2	2-3
SSS3	4-5
SSS4	6 & more

SSS	without hg/sb formation		with hg/sb formation in both rural & urban strata	
	Rural	Urban	hg1/sb1	hg2/sb2
h1	1	1	1	1
h2	2	3	2	2
h3	4	4	2	2
h4	3	2	1	1
Total	10	10	6	6

2.17 Selection of Households:

From each Second Stage Strata the sample households are selected by simple random sampling without replacement.

2.18 Shortfall of households to be compensated:

Shortfall of households in the frame of any particular SSS will be compensated from the same SSS of the other hg/sb or from the other SSS of the same or other hg/sb where additional household(s) are available. The procedure is as follows:

Step 1: Allocate the required number of households to each SSS wherever possible and identify the SSS having shortfall.

Step 2: In case of hg/sb formation, compensate from the same SSS of the other hg/sb, if available. Otherwise, go to Step 3.

Step 3: Find the SSS where additional households are available following the priority order of SSS 1, SSS 2, SSS 3 & SSS 4 and compensate.

2.19 The table given below may be useful for deciding the SSS from

which the compensation is to be made.

SSS having shortfall	priority order of SSS for compensation
1	2, 3, 4
2	1, 3, 4
3	1, 2, 4
4	1, 2, 3

2.20 If there is hg/sb formation, for each SSS as per priority order, compensation may be made from the hg/sb where shortfall occurs, failing which from other hg/sb and so on.

2.21 For example, if shortfall is in SSS 3 of hg/sb 1, first try to compensate from SSS3 of hg/sb 2,

failing which try from SSS 1 of hg/sb 1, failing which try from SSS 1 of hg/sb 2. If the shortfall still remains then try from SSS 2 of hg/sb 1, failing which try from SSS 2 of hg/ sb 2. If the shortfall still remains then try from SSS 4 of hg/sb 1, failing which try from SSS 4 of hg/ sb 2.

Estimation Procedure

t = subscript for t-th stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU (village/panchayat ward/ UFS block)

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/hg/sb (j = 1,2,3,4)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D* = 1 if D = 1

= D-1 for FSUs with D > 1

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum

z = size of selected sample village

n = number of sample FSUs surveyed in a stratum

H = total number of households listed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

h = number of households surveyed in a second-stage stratum of an FSU / hamlet-group or sub-block of sample FSU

x, y = observed value of characteristics x, y under estimation

\bar{X}, \bar{Y} = estimate of population total X, Y for the characteristics x, y

Under the above symbols,

y_{tmidjk} = observed value of the characteristic y for the k -th household in the j -th second stage stratum of the d -th hg/ sb ($d = 1, 2$) of the i -th FSU belonging to the m -th sub-sample for the t -th stratum.

Formulae for Estimation of Aggregates for a stratum in a district (rural & urban)

Listing Schedule 'A'

Rural stratum: For estimating the number of households possessing a characteristic

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in hg's 1 & 2 of the i -th FSU respectively.

Urban Stratum: For estimating the number of households possessing a characteristic in the urban stratum of a district.

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \{y_{i1} + D_i^* y_{i2}\}$$

Where y_{i1}, y_{i2} are the total number of households possessing the characteristic y in sub-blocks 1 & 2 of i -th FSU respectively.

Schedule 'B': (Employment – Unemployment Survey Schedule)

Estimation formula for a rural stratum in a district:

Rural:

$$\hat{Y} = \sum_{j=1}^4 \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Estimation formula for an urban stratum in a District:

$$\hat{Y} = \sum_{j=1}^4 \frac{N}{n_j} \sum_{i=1}^{n_j} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

Overall Estimate for Aggregates:

Overall estimate for aggregates for a stratum (\hat{Y}_t) based on two sub-samples is obtained as:

$$\hat{Y}_t = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{tm}$$

Overall Estimate of Aggregates at State/UT/all-India level:

The overall estimate \hat{Y} at the State/ UT/ all-India level is obtained by summing the stratum estimates \hat{Y}_t over all strata belonging to the State/ UT/ All-India.

Note: 1. Population and Percentage decadal change in population aged 15 years and above were calculated using Table C13 of Census 2001 and 2011.

2. For any category of persons of any State/UT/All-India, Projected population as on 1st March 2014 has been derived using the formula. $A=A1*[[1+(R/100)]^{(36/120)}]$, where A1 is the census population as on 1st March 2011, R is the percentage decadal change in population between 2001 and 2011 and A is the projected population as on 1st March 2014.

Annexure-III

Table (A4): Census Population as on 1st March 2011, percentage decadal change in population of aged 15 years and above between census 2001 and 2011 and projected population as on 1st March 2014 for each State/UT and All-India.

Description of NIC 2008 Section

Section	Description	Code
Section A	Agriculture, forestry and fishing	Code 1
Section B	Mining and quarrying	Code 2
Section C	Manufacturing	Code 3
Section D	Electricity, gas, steam and air conditioning supply	Code 4
Section E	Water supply; sewerage, waste management and remediation activities	Code 4
Section F	Construction	Code 5
Section G	Wholesale and retail trade; repair of motor vehicles and motorcycles	Code 6
Section H	Transportation and storage	Code 6
Section I	Accommodation and Food service activities	Code 6
Section J	Information and communication	Code 6
Section K	Financial and insurance activities	Code 7
Section L	Real estate activities	Code 7
Section M	Professional, scientific and technical activities	Code 7
Section N	Administrative and support service activities	Code 7
Section O	Public administration and defence; compulsory social security	Code 8
Section P	Education	Code 8
Section Q	Human health and social work activities	Code 8
Section R	Arts, entertainment and recreation	Code 8
Section S	Other service activities	Code 8
Section T	Activities of households as employers; undifferentiated goods and services producing activities of households for own use	Code 9
Section U	Activities of extraterritorial organizations and bodies	Code 9

.....about the Labour Bureau

An apex organization for providing data base at the national level for policy formulation, evaluation and research, the Labour Bureau in the Union Ministry of Labour and Employment is the epicenter of all activities involving planning, collection and dissemination of data on various facets of Labour which forms a sound basis for decision making in the Government, industry and by various other user organizations/individuals. Labour Bureau is a store house of important economic indicators like the Consumer Price Index Numbers for industrial and agricultural workers, wage rates, industrial relations, socio-economic conditions in un-organized sector, evaluation and review of working of labour legislations in the country and the like. Labour Bureau has been providing an uninterrupted service to the national and international fora like ILO for the last fifty years. Today, it has assumed an important role in the labour matters and has acquired an un-disputed and indispensable status in the field of labour statistics. Equipped with the expertise of conducting surveys at the national/regional level in diverse fields and in providing in-depth analysis, the organization continues in its pursuit of excellence.
