## **PREFACE**

India's population is growing at a rate of 17.7 per cent per decade and its current size is around 1.21 billion according to 2011 census. India is among the youth countries of the world and its young population (15-59 years) is increasing steadily. Population projections show that the average age of India's population is expected to be around 29 years in 2020 as against 37 years in China and the United States of America, 45 years in West Europe and 48 years in Japan. As the developed countries of the world are observing higher rate and ageing, the global economy is expected to witness a shortage of young population of around 56 million by 2020. But India would be the only country with a surplus of 47 million youth.

India has a great opportunity to meet the future skilled manpower demands of the World, India can become the worldwide sourcing hub for skilled workforce. The challenges for India get magnified, as it needs to reach out to the million plus workforce ready population, while facing an ever increasing migration of labour from agriculture to manufacturing and services. With the government launching a number of schemes to empower the young workforce, the challenges magnify as there is a need for effective implementation of the schemes at the grass root level with equal participation from all the stakeholders concerned.

Under Fourth Annual Employment-Unemployment Survey, an attempt has been made to assess the skill scenario of the country. The information related to vocational training of population aged 15 years and above has been collected. In the current report, education and skill related parameters have been generated by social group, type of vocational training, broad activity status, etc. for all States/UTs as well as at All India level to explore the current scenario of education and vocational training.

I hope the report will prove to be an important input for the policymakers to draft/review the policies particularly related to the education and skill development which will help our country to become a skill capital of the world during the coming decades.

<b>Tables (5)</b>	<b>Per 1000 distribution of persons aged 15 years &amp; above who received/receiving vocational training pursuing different activities based on Usual Principal Status (ps) approach for each State/UT</b>	<b>155-157</b>
<b>Tables (6)</b>	<b>Per 1000 distribution of persons aged 15 years and above who received/receiving vocational training in different fields and pursuing different economic activities based on Usual Principal Status (ps) approach at All India level</b>	<b>158-160</b>

## **EXECUTIVE SUMMARY**

- The Report, “Education, Skill Development and Labour Force” is based on the Fourth Annual Employment-Unemployment Survey 2013-14 conducted by Labour Bureau.
- The survey has been conducted in all the States/UTs by covering all the districts and the field work executed from January, 2014 to July, 2014.
- A total sample of 1,36,395 household schedules has been covered with a break up of 83,385 households in the rural sector and 53,010 households in the urban sector.
- From the households covered, 6,80,392 members are surveyed out of which 4,20,239 members reside in rural households and rest 2,60,153 in the urban households.
- All the education and skill related tables are generated for State/Gender/Sector/Social Group wise.
- All the estimates are derived for the persons aged 15 years and above only.
- Population aged 15 years and above who received/are receiving vocational training is estimated at 6.8 per cent at All India level. In rural and urban areas, it is 6.2 and 8.2 per cent respectively.
- Among the social groups, a highest 7.2 per cent of persons aged 15 years and above under Other Backward Classes and Others category each have reported to received/receiving vocational training followed by 5.9 per cent under Scheduled Caste category and 5.6 per cent under Scheduled Tribe category.

- About 76 per cent of the persons aged 15 years and above have reported to be employed at All India level who have received/receiving vocational training during the reference period.
- A significant proportion of females, about 39 per cent, have not joined the labour force after receiving vocational training in different fields.
- Analysis of the results at social group level reveals that 46 per cent of females under the Others category have reported to be "not in labour force" classification after receiving vocational training in different fields.
- The survey results reveal that with increase in education level, the unemployment rate, among persons aged 15 years and above, has also increased.
- In case of 'graduates' and 'post graduates' the unemployment rate is about 14 per cent and 12 per cent respectively based on Usual Principal Status approach. Whereas in case of 'not literate' and 'below primary' persons, the unemployment rate is less than 2 per cent each based on survey results.
- The survey results have been derived separately for persons receiving/received formal and informal vocational training. Out of the 6.8 per cent Vocational trained persons, 2.8 per cent received formal training and remaining 4 per cent were informally trained.
- The percentages of formally trained persons are estimated at 2.2 and 4.4 per cent in rural and urban sectors respectively.
- The percentages of informally trained persons are estimated at 4.0 and 3.8 in rural and urban sectors respectively.
- In case of informal training, the percentage of vocationally trained unemployed persons is found marginal at 3.1 per cent whereas in case of formal vocational training acquired, the percentage of unemployed persons is estimated at 14.5.

- Among vocationally trained employed persons, 45.2 per cent are in self employed category followed by 30 per cent under wage/salaried employee. The share of vocationally trained contract worker category is the lowest at 5.8 per cent.
- Among formally trained employed persons, about 60 per cent are reported in wage/salaried category followed by 26 per cent under the self-employed category.
- In case of informal trained employed persons, a majority of about 55 per cent are self employed followed by 24 per cent under casual category and 15 per cent as wage/salaried earners.

# CHAPTER I

## INTRODUCTION

**1.01** Youth Bulge is a demographic dividend in developing countries like India when they are effectively utilized for economic growth. The “demographic dividend” accounts for India having world’s youngest work force with a median age way below that of China and OECD Countries. The youth segment of India’s Population is growing rapidly and is projected to continue to do so for the next 30 years provided India can act quickly in education and employment, this demographic dividend has the potential to inject new dynamism into the economy.

**1.02** Beside this window of opportunity for India, the global economy is expected to witness a skilled man power shortage to the extent of around 56 million by 2020 but India would be the only country with a surplus of 47 million youth. Thus, the “demographic dividend” in India

needs to be exploited not only to expand the production possibility frontier but also to meet the skilled manpower requirements in India and abroad.

**1.03** India has to provide quality education and develop the skills of its large young population to fully reap the benefits of the demographic dividend. Currently, many programmes are being implemented both in elementary and secondary education and also higher and technical education in order to achieve the desired results. (Economic Survey, 2014).

**1.04** In order to increase the quality as well as accessibility of elementary education in India, the Parliament of India enacted the Right to Education (RTE) Act, 2009 in April 2010 with the objective of making free and compulsory elementary education a right for children. The central Government introduced several

schemes like Sarva Shiksha Abhiyan (SSA), Mid-Day Meal (MDM), Rashtriya Madhyamik Shiksha Abhiyan (RMSA), Model School Scheme (MSS) and Saakshar Bharat (SB)/ Adult Education which aimed to enhance the access to secondary education and improve its quality, build capacity in secondary schools on par with expanded primary enrolments, female literacy, etc.

**1.05** While India has some of the best institutions of the world, in terms of quality of education, a lot more needs to be done. Some recent initiatives in the area of higher and vocational education which aimed to enhance the access, equality, quality, innovation, etc. are Rashtriya Uchchar Shiksha Abhiyan (RUSA), Technical Education Quality Improvement Programme (TEQIP) and National Skill Qualification Framework (NSQF). Central Government's interest subsidy on educational loans introduced in 2009-10, for all economically weaker section (EWS) students enables them to access higher education.

## **Skill Development**

**1.06** Skill development is vital not only for reaping the benefits of demographic dividend, but also for greater inclusive growth. To bridge the demand-supply mismatch of skilled persons, the National Skill Development Corporation (NSDC) has initiated sector wise job-oriented skill training programmes.

**1.07** Education and Skill are the powerful factors of economic growth and social development of a country. Among the challenges and opportunities of the world of work, countries with enhanced levels of skills can adjust more effectively. To achieve India's aim to become a 'knowledge economy' in the coming decades, the country should give ample importance to advancement of skills and these skills have to be relevant to the emerging economic environment. A steady annual GDP growth of 8-9 per cent is required to achieve India's Economic growth and inclusive development targets, which requires significant progress in several areas, including

infrastructure development, agricultural growth coupled with productivity improvements, financial sector growth, a healthy business environment, ably supported by a skilled workforce (IMaCS, 2010).

**1.08** The significance of primary sector declines while that of secondary and tertiary sectors increases along with the economic development of the country. The share of GDP in primary sector has declined from 51 per cent in 1950-51 to around 17 per cent in recent years. On the other hand, the share of the secondary sector has almost doubled from 14 per cent in 1950-51 to 26 per cent. The service sector (tertiary sector) has grown substantially since 1950-51, with its share in GDP going up from 33 per cent in 1950-51 to over 56 per cent in 2012-13. Earlier, the primary sector was dominant but now tertiary sector is dominant in the economy.

**1.09** The transition of economy from primary to tertiary implies migration of a large portion of workforce from the primary

sector (agriculture) to the tertiary sector. However, the skill sets that are required in service sector are quite different from those in the agriculture sector. This implies a large skill gap during the period of sectorial transition, as evidenced by a shrinking employment in the agriculture sector. This scenario requires skill development in the workforce.

#### **Skill Development Scenario and Challenges:**

**1.10** Education, including all aspects of higher education and college education falls under the Ministry of Human Resource Development. The University and Higher Education arm are responsible for all college education (Arts, Science, Commerce, etc.), while engineering education, polytechnics, etc., fall under the category of Technical Education. The University Grants Commission (UGC) provides funds in the form of grants and also coordinates as well as sets standards for teaching, examination and research in universities. The All India

Council for Technical Education (AICTE) is the regulatory body for Technical Education in India. Its objectives are: promotion of quality in technical education, planning and coordinated development of technical education system, regulation and maintenance of norms and standards.

**1.11** A large part of the current vocational training infrastructure, the Government ITIs and Private ITCs, falls under the Ministry of Labour and Employment's Directorate General of Employment and Training (DGET). The National Council on Vocation Training (NCVT) plays a key role in the formation of training curriculum, policies, standards, as well as in certification by means of the 'trade test'.

**1.12** Skills in India are largely acquired through two main sources: formal training and informal. Nowadays, vocational courses are becoming quite popular among youth because it is believed that taking these courses would provide more and

better employment opportunities than those provided by conventional academic courses.

**1.13** The current size of India's formally skilled workforce is small, with approximately 2 per cent. Furthermore, the number is even lower than that of smaller countries, South Korea and Japan, which have 96 and 80 per cent respectively. Limited participation of the private sector has been one of the major reasons for the marginal size of the formally skilled workforce. The poor skill levels among India's workforce are attributed to dearth of a formal vocational education framework, with wide variation in quality, High school dropout rates, Inadequate skills training capacity and negative perception towards skilling and Lack of "industry-ready" skills, even in professional courses (Ernst & Young LLP and FICCI, 2013)

**1.14** National Policy on Skill Development, 2009 aims to train 500 million people by 2022 by empowering all individuals through improved skills,

knowledge and nationally and internationally recognised qualifications to gain access to decent employment and ensure India's competitiveness in global market. It also aims to increase workforce in organised and unorganised sectors especially among youth, women, disables and disadvantage sections.

**1.15** The Government of India (GOI) has set a target to impart the necessary skills to 500 million people by 2022, in line with its forecast of a significant requirement of skilled manpower over the next decade. However, some experts have raised concerns over the magnitude of the target. In this regard, the Institute of Applied Manpower Research (IAMR) (a government think-tank) has computed new skill gap figures to arrive at a “realistic” overall target. According to IAMR’s analysis, the total number of people who need to be trained by 2022 ranges between 249 and 290 million across differing skill requirement scenarios. The Twelfth plan has embarked on a relatively modest target of skilling 80 million

people until 2019, which leaves around 400 million people to be trained in the Thirteenth plan by 2022.

## **Skill development and Inclusive Growth**

**1.16** Skill development is essential for achieving faster, sustainable and inclusive growth on the one hand and for providing decent employment opportunities to the youth on the other. The effective utilization of demographic dividends in India by empowering the youth with ample skill sets would make India as a skill capital of the world during the next decades.

**1.17** India’s policy planners now recognize that while sustaining the high economic growth achieved over the past few years is important, our priority as a nation has to be on making the growth process more inclusive. This has come out quite prominently in the country’s 11th Five Year Plan and is also expected to guide the various policies and programmes of the 12th Plan.

**1.18** Education is an important vehicle for enhancing people's capacities. Education foundation provided in schools, which equips children with appropriate skills, attitudes and values to contribute as effective social and economic agents in the society. Universalizing school education continues to be a thrust area in the country through various legislative and programmatic interventions. Recently the focus has been shifted on skill development and job-oriented education, provided traditionally through vocational training and other higher education institutes.

### **Skill Development and Unemployment**

**1.19** As per third Annual Employment Unemployment Survey, the general education level of 15 years and above population showed an increasing trend in unemployment on par with the level of education, which indicates that the lack employability for available jobs or non availability of opportunities for available skill set. The mismatch in skill set or unemployment will make the

grace of demographic dividend as disgrace.

**1.20** In order to reap the demographic dividend, Government of India is formulating policies and programmes to develop skill sets among the youth of the country. Data regarding education and skill at regular interval is required for proper planning and policy formation. Keeping in view Labour Bureau, collected data on education and vocational training under fourth Annual Employment-Unemployment Survey and the results presented in this volume.

## CHAPTER II

### EDUCATION AND SKILL DEVELOPMENT

#### Vocational Training

**2.01** Skill development is one of the paramount subject matter in India and the Government initiated various policies and programmes to improve or create skills in its labour force. Considering the ample importance of skill development,

Labour Bureau collected information related to vocational training under Fourth Annual Employment – Unemployment Survey 2013-14 for persons aged 15 years and above. This chapter portrays National level highlights of education and skill development in India.

**Figure-1: Distribution of persons aged 15 years & above who received vocational training (in %)**

**2.02** Figure 1 exhibits the distribution of persons aged 15 years & above who received/are receiving vocational training during the reference period. Vocational training plays a vital role in developing skills among

the people. At all India level around 6.8 per cent of persons aged 15 years and above are reported to have received/receiving vocational training. The percentage of population who received/are

receiving vocational training in rural and urban areas is estimated at 6.2 and 8.2 per cent respectively. The gender wise estimates show that the

percentage of females who received/are receiving vocational training is about one-third of its counterpart.

**Table 2.1: Distribution of persons aged 15 years & above who received/receiving vocational training by broad activity status (in %)**

Sector	employed			un-employed			not in labour force		
	Male	Female	Person	Male	Female	Person	Male	Female	Person
<b>Rural + Urban</b>	84.9	51.0	76.3	4.8	10.1	6.1	10.4	39.0	17.6
<b>Rural</b>	85.2	53.0	77.6	4.9	10.5	6.2	9.9	36.5	16.2
<b>Urban</b>	84.2	47.8	74.0	4.5	9.5	5.9	11.3	42.7	20.1

**2.03** Table 2.1 presents distribution of persons aged 15 years & above who received/are receiving vocational training by broad activity status under Usual Principal Status (UPS) Approach. Among the persons reported as received/receiving vocational training, around 76 per cent are reported to be employed and 6 per cent belongs to unemployed category. A noticeable share (18 per cent) of population received/receiving vocational training are reported to be not participating in the labour force. A significantly high proportion of females (39 per cent) has reported to be out of labour force. The rural-urban estimates are not showing any

commendable variation among broad activity status. The results are compiled for all the States/UTs by Social Group/Gender/Sector wise.

### **Education level and Broad activity**

**2.04** Distribution for persons aged 15 years & above by educational classification and main activity status is exhibited in Figure 2. The survey results reveal high labour force participation among graduates and post graduates persons. However, the unemployed proportion is also on the increase with increase in education level. The unemployed proportion

among graduates and post graduates are estimated at 8.7 per cent and 8.9 per cent respectively. The secondary and higher secondary category reported low rate of participation in labour force and are estimated

at 54.5 per cent and 56.2 per cent respectively. The unemployment proportion among secondary and higher secondary is estimated at 0.7 and 0.8 per cent respectively.

**Figure - 2: Distribution for persons aged 15 years & above by main activity & educational classification (in %)**

**2.05** The results of education classification and main activity has been compiled for all the States/UTs by Gender/Social-Group/Sector.

### **Type of Training**

**2.06** The information related to receiving/received vocational training are collected by type of training namely formal and

informal. As per the concepts and definitions of this survey, Informal training is defined as the process of acquiring the expertise in a vocation through ancestors over generations. The

formal vocational training is a training which is acquired through institutions under structural training programme and led to recognised certificate or diploma.

**Figure - 3: Distribution of persons aged 15 years & above by type of vocational training (in %)**

**2.07** Figure 3 shows pattern of vocational training of population

aged 15 years and above. At All India level, only 6.8 per cent of

the population are reported as received/receiving vocational training, out of which, majority of the persons i.e. 4 per cent acquired/were acquiring vocational training through informal system. Only 2.8 per cent of the population aged 15 years and above are reported to have received/receiving formal

vocational training. Going through the sector wise estimates, majority of the vocationally trained (4 per cent) population in rural areas acquired training through informal system, where as in urban areas 4.4 per cent obtained formal vocational training.

**Table 2.2: Distribution of labour force aged 15 years & above who received/are receiving vocational training by gender, nature of training and activity status (in %)**

Type of Training	employed			unemployed		
	Male	Female	Persons	Male	Female	Persons
<b>Formal</b>	88.7	75.6	85.5	11.3	24.4	14.5
<b>Informal</b>	98.0	90.9	96.9	2.0	9.1	2.8

**2.08** Among informally trained labour force, 96.9 per cent are employed under the Usual Principal Status approach. At the same time only 85.5 per cent of the formally trained persons are reported as employed under the same approach. The results indicate a true picture of India's economy, which have dominant share of unorganised sector.

**2.09** Figure 4 presents the distribution of vocationally trained/being trained labour

force by activity status as per UPS approach and field of training. While comparing the formally and informally trained groups, it can be seen that the unemployment rate is less in informally trained labour force. Among informally trained labour force, the percent of unemployed persons is found high in fitter and engineering trades other than civil, computer trades vocations in comparison with other vocations.

01- Engineering trades other than civil, computer trades, 02 - Civil engineering and building construction related works, 03 - Leather related work, 04 - Textile related work, 05-Catering, nutrition, hotels and restaurant related work, 06- Agriculture and crop production related skills and food preservation related work, non-crop based agricultural and other related activities, 07 -Health and paramedical services, 08 - Work related to childcare, nutrition, pre-schools and crèche, 09 - Office and business related work, 10 - Driving and motor mechanic work, 11 - Beautician, hairdressing & related work, 12 - Work related to tour operators/ travel managers, 13 - Plumber, 14 - Fitter, 15 - Mechanist,99 - Others.

**Figure 4: Distribution of labour force aged 15 years and above received/receiving vocational training in different fields at All India level (in %)**

**Table 2.3: Distribution of persons aged 15 years & above who received/receiving vocational training by activities based on Usual Principal Status (ps) approach(in %)**

	self employed	wage/salaried employee	contract worker	casual worker
<b>Rural + Urban</b>	45.2	30.7	5.8	18.3
<b>Rural</b>	48.3	24.4	6.4	20.9
<b>Urban</b>	39.2	43.0	4.7	13.2

**2.10** Under broad category of employed persons who received/are receiving vocational training, 45.2 per cent are in self employed category followed by wage/salaried employee (30.7 per cent). The share of vocationally

trained contract worker category is the lowest at 5.8 per cent. The variation in rural-urban estimates are due to the distribution pattern of employed persons under these activities in rural and urban areas.

**Figure 5: Distribution of persons aged 15 years and above who received/are receiving vocational training and pursuing different economic activities based on usual principal status (ps) approach (in %)**

**2.11** Among formally trained employed persons, more than 50 per cent were reported in wage/salaried category followed by self-employed category. In the case of informally trained

employed persons more than half were reported in self-employed category followed by casual workers. The rural-urban wise estimated percentages are exhibited in Figure 5.

**CONCEPTS AND DEFINITIONS**

Important concepts and definitions used in the survey and relevant to this report are explained below.

**1.1 House:** Every structure, tent or other place of shelter, etc. which is used primarily for residential use is considered as a house for the present survey.

**1.2 Household:** A group of persons normally living together and taking food from a common kitchen constitutes a household. It will include temporary stay-aways (those whose total period of absence from the household is expected to be less than 6 months) but exclude temporary visitors and guests (expected total period of stay less than 6 months). The members of a household may or may not be related by blood or marriage to one another. The following examples may be useful while determining the group of persons to be considered as households:

- (a) In case a hostel is listed, it will constitute a single household.
- (b) Inmates of hotel, lodging and boarding house etc. will also constitute a single household.
- (c) In deciding the composition of a household, more emphasis is to be placed on 'normally living together' than on ordinarily taking food from a common kitchen. In case the place of residence of a person is different from the place of boarding, he or she will be treated as a member of the household in which he or she resides.
- (d) A resident employee, or domestic servant or a paying guest will be considered as a member of the household in which he or she resides even though he or she is not a member of the same family if the period of stay is six month or above.
- (e) In case a member of a family (say a son or a daughter of the head of family) stays elsewhere like in hostel for studies or for any other reason for major part of the year, he/she will not be considered as a member of his/her parents household.

**1.3 Household size:** The number of members normally residing in a household is its size.

**1.4 Economic activity:** The entire spectrum of human activity falls into two categories: i) economic activity and ii) non-economic activity. Any activity that results in production of goods and services which adds value to the national product is considered as an economic activity. Further the economic activities have two parts namely i) market activities and ii) non-market activities. Market activities are those that involve remuneration to those who perform it, i.e., activity performed for pay or profit. Such activities include production of all goods and services for market including those of government services, etc. On the other hand non-market activities are those involving the production of primary commodities for own consumption and own account production of fixed assets.

**1.5** Thus the term 'economic activity' under the fourth Annual Employment and Unemployment survey includes:

- i. All the market activities described above, i.e., the activities performed for pay or profit which result in production

of goods and services for exchange,

- ii. Of the non-market activities,
  - a) All the activities relating to the primary sector which result in production (including free collection of uncultivated crops, forestry, firewood, hunting, fishing, mining, quarrying, etc.) of primary goods for own consumption.
  - b) The activities relating to the own-account production of fixed assets. Own account production of fixed assets include construction of own houses, roads, wells, etc., and of machinery, tools, etc., for household enterprise and also construction of any private or community facilities free of charge. A person may be engaged in own account construction in the capacity of either a labour or a supervisor.

**1.6 Activity status:** It is the activity in which a person is engaged during the reference period, which in turn decides the person's participation in economic and /or non-economic activities. According to this, a person will be in one or a combination of the

following three statuses during a reference period:

- i. Working or engaged in economic activity (work);
- ii. Not engaged in economic activity (work) but either making tangible efforts to seek 'work' or being available for 'work' in case the 'work' is available and
- iii. Neither engaged in any economic activity (work) nor available for 'work'.

**1.7** Activity statuses mentioned against sl. no. (i) & (ii) above, are associated with 'being in labour force' and the last sl.no. (iii) is associated with 'not being in the labour force'. Being in labour force is further categorized into two parts (i) employed and unemployed.

**1.8** The three broad activity statuses have been further sub-divided into the following categories as listed below:

- i. working or being engaged in economic activity (employed):
  - a) worked as an own-account worker (self-employed);
  - b) employer (self-employed);
  - c) worked in household enterprise as 'helper' (unpaid family worker);

d) worked as regular salaried/wage employee other than contract worker;

e) worked as contract worker;

f) worked as casual wage labour in public works;

g) worked as casual wage labour in other types of works;

- ii. not working but seeking or available for work (unemployed);

- iii. neither working nor available for work (not in labour force)

- i) attended educational institution;

- ii) attended domestic duties;

- iii) recipients of rent, pension, remittance, etc;

- iv) not able to work due to disability;

- v) Others (prostitutes, beggars, etc.);

**1.9** The various concepts like, 'workers', 'unemployed', labour force, out of labour force are as explained below:

**1.10 Workers (or employed):**

Persons who during the reference period are engaged in any economic activity or who, despite their attachment to their economic activity, have temporarily abstained from work, for reasons of illness, injury or other physical

disability, bad weather, festivals, social or religious functions or other contingencies necessitating temporary absence from work constitute workers. Unpaid helpers who assist in the operation of an economic activity in the household, farm or non-farm activities are also considered as workers.

**1.11 Seeking or available for work (or unemployed):** Persons, who owing to lack of work, had not worked but either sought work through employment exchanges, intermediaries, friends or relatives or by making applications to prospective employers or expressed their willingness or availability for work under the prevailing condition of work and remuneration are considered as those who are 'seeking or available for work' (or unemployed).

**1.12 Labour force:** Persons who are either 'working' (employed) or 'seeking or available for work' (unemployed) or both during a major part of the reference period, constitute the labour force.

**1.13 Out of labour force:** Persons who are neither 'working' and at the same time nor 'seeking or available for work' for various reasons during the major part of

the reference period are considered to be 'out of the labour force'. The persons under this category includes students, persons engaged in domestic duties, rentiers, pensioners, recipients of remittances, those living on alms, infirm or disabled persons, too young or too old persons, beggars, prostitutes, etc.

**1.14** It may be noted that workers have been further categorized as self-employed, regular salaried/wage employee and casual wage labour. The details of these categories are defined in the following paragraphs.

**1.15 Self-employed:** Persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are considered as self-employed. The essential feature of the self-employed is that they have autonomy (i.e., regarding how, where and when to produce) and economic independence (i.e. regarding market, scale of operation and money) for carrying out operation. The fee or remuneration received by them consists of two parts - the share of their labour and profit of the enterprise. In other words, their

remuneration is determined wholly or mainly by sales or profits of the goods or services which are produced.

**1.16** The self-employed persons may again be categorized into the following groups:

- i) **Own-account workers:** The self-employed persons, who operate their enterprises on their own account or with one or a few partners and who during the reference period by and large, run their enterprises without hiring any labour are called as own account workers. They may, however, have unpaid helpers to assist them in the activity of the enterprise.
- ii) **Employers:** The self-employed persons who work on their own account or with one or a few partners and by and large run their enterprises by hiring labour are considered as the employers.
- iii) **Helpers in household enterprise:** The helpers are a category of self-employed persons, mostly family members, who keep themselves engaged in their household enterprises, working full or part time and do not receive

any regular salary or wages in return for the work performed. They do not run the household enterprise on their own but assist the related person living in the same household in running the household enterprise.

**1.17 Regular salaried/wage employee other than contract workers:** Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are the regular salaried/wage employees. The category not only includes persons getting time-rate wage but also persons receiving piece-rate wage or salary and paid apprentices, both full time and part-time.

**1.18 Worked on contract basis:** As per the definition of contract worker, a worker is deemed to be employed as contract worker when he/she is hired in connection with the work of an establishment by or through a contractor. Contract workmen are indirect employees; persons who are hired, supervised and remunerated by a contractor who, in turn, is compensated by the establishment. For the purpose

of present survey, in addition to the above mentioned category of workers, the term contract workers includes workers whose work are governed by a contract agreement either in writing or oral directly by the establishment. More precisely, the workers hired by the establishment directly for a specific job and for a specified period will also be categorized under the contract category of workers.

**1.19 Casual wage labour:** A person casually engaged in others farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is a casual wage labour. Usually in the rural areas, a type of casual labourers can be seen who normally engage themselves in 'public works' activities. 'Public works' are those activities which are sponsored by the Government or local bodies for construction of roads, digging of ponds, etc. as relief measures (like flood relief, drought relief, famine relief, etc.) and also under various employment generation schemes under poverty alleviation programmes.

**1.20 Different approaches for determining activity status:** The persons surveyed can be classified into various activity categories on the basis of activities pursued by them during certain specified reference periods. There could be three reference periods viz. (i) one year, (ii) one week and (iii) each day of the reference week. Based on these three reference periods, three different measures of activity status are arrived at. These are termed respectively as usual principal status, current weekly status and current daily status. The activity status determined on the basis of a reference period of one year is known as the usual principal activity status of the person, that determined on the basis of a reference period of 1 week is known as the current weekly status (CWS) of the person and the activity status determined on the basis of a reference period of one day is known as the current daily status (CDS) of the person. In this report, the labour force related parameters are estimated for a reference period of one year.

**1.21 Usual activity status:** The usual activity status relates to the activity status of a person during the last completed twelve months from the date of survey. The

activity in which a person spent relatively longer time (major time criterion) during the reference period is considered as the usual principal activity of the person. To decide the usual principal activity of a person, he/she is first categorized as belonging to the labour force or not during the reference period on the basis of major time criterion. Persons, thus adjudged as not belonging to the labour force are assigned the broad activity status 'neither working nor available for work'.

**1.22** For the persons belonging to the labour force, the broad activity status of either 'working' or 'not working but available for work and/or seeking work' is then ascertained again on the basis of the relatively longer time spent during the period in the labour force. Within the broad activity

status so determined, the detailed activity status category of a person pursuing more than one such activity will be determined again on the basis of the relatively longer time spent.

### **1.23 Subsidiary economic**

**activity status:** A person whose usual principal status is determined on the basis of the major time criterion may have pursued some other economic activity for 30 days or more during the reference period. The status in which such economic activity is pursued during the reference period is the subsidiary economic activity status of the person. In case of multiple subsidiary economic activities, subsidiary activity will be determined on the basis of relatively longer time spent criterion.

## **SAMPLING DESIGN & ESTIMATION PROCEDURE**

### **Introduction**

Labour Bureau has been entrusted with the task of conducting Annual Employment-Unemployment Surveys in the country. The objective of this annual survey is to regularly make available the basic inputs on labour force related parameters to facilitate policy formulation/review. The first such Annual Household Employment-Unemployment survey for the period 2009-10 was conducted during the year 2010. Till so far three such surveys have been conducted and thereon reports released. The present one is the Fourth Annual Employment-Unemployment Survey in the series.

**2.4** In the current survey, a moving reference period is used to determine the usual status activity of the persons. The survey has been conducted in all the States/UTs by covering all the districts in the country. The field work of the present survey was launched in January, 2014 and completed in majority of the States/UTs by June, 2014. A

sample of about 1.36 lakh household schedules has been covered during the survey in 36 States/UTs.

**2.5 Sample Design:** A stratified multi-stage sample design has been adopted for the Fourth Annual Household Employment-Unemployment Survey. The first stage units (FSU) for rural sector are the 2011 census villages in all the States/UTs, except Kerala State, where panchayat wards are the FSUs. In case of urban sector, the latest available Urban Frame Survey (UFS) blocks for the period 2007-12 prepared by National Sample Survey Office are the First stage units.

**2.6 Stratification:** Each district of a State/UT has been divided into two strata: i) rural stratum comprising of all the rural areas of the district and ii) urban stratum comprising of all the urban areas of the district.

**2.7 Sample Size:** In all 36 States/UTs, a total sample of

12598 First Stage Units (FSUs) is allocated at All India level keeping in view the resource availability and other logistics. Broadly considering the population proportion, a sample of 7270 FSUs is allocated to rural sector in all the 36 States/UTs, while rest 5328 FSUs are allocated in the urban sector. While allocating the sample, additional weight age is given to the urban sector as compared to rural sector; so that the urban areas are not under represented in the survey on the basis of proportional allocation, with the condition that in major states the total sample size in urban sector does not exceed that of the rural sector.

**2.8 Allocation of Sample to States/UTs:** Distribution of total number of sample FSUs in rural sector among the States/UTs is done in proportion to their respective rural population as per 2011 census, subject to a minimum sample allocation to each State/UT. For urban sector, the sample FSUs are allocated among the 36 States/UTs in proportion to the UFS blocks for the period 2007-12. A minimum sample size in a State/UT is allocated at 16 FSUs with a

minimum of 8 each in rural and urban areas.

**2.9 Allocation of State/UT level rural and Urban Stratum sample to districts:** The State/UT level rural/ urban sample is further distributed among its districts in proportion to rural/ urban population/urban frame survey blocks. A minimum of 16 FSUs are allocated to each State/UT for rural and urban areas combined. Stratum level sample is adjusted to multiple of 4 FSUs with a minimum sample size of 4 FSUs in a stratum. In case of some North Eastern States and UTs a marginal increase in sample size is done due to their under representation in overall sample because of their lower population.

**2.10 Selection of FSUs:** For the rural stratum, the village lists based on 2011 census frame are taken in the same order and the required sample is drawn by using circular systematic sampling technique with probability proportional to size (size being the population of the village as per Census 2011). In case of urban stratum, the UFS blocks are arranged in ascending order based on the town variable. After

arranging UFS blocks, sample is drawn by circular systematic sampling. This arrangement is done to ensure that most of the towns are represented in the sample. In both, the rural and the urban strata, samples are drawn in the form of two independent sub-samples.

**2.11 Criteria for hamlet group/sub block formation:** Large FSUs having approximate present population of 1200 or more are divided into a suitable number (say, D) of 'hamlet-groups'(hg) in the rural sector and 'sub-blocks'(sb) in the urban sector as stated below.

Approximate present population of the sample village/ urban block	No. of hg/sb to be formed (d)
Less than 1200 (no hamlet-group/sub block)	1
1200 to 1799	3
1800 to 2399	4
2400 to 2999	5
3000 to 3599	6
.....and so on	

**2.12** For rural areas of Himachal Pradesh, Sikkim, Uttarakhand (except Dehradun plains, Nainital Plains, Haridwar and Udham Singh Nagar), Poonch, Rajouri,

Udhampur, Doda, Leh (Ladakh), Kargil districts of Jammu & Kashmir and Idukki district of Kerala, the number of hamlet groups are formed as follows:

Approximate present population of the sample village/ block	No. of hgs/ sbs to be formed (d)
Less than 600 (no hamlet-groups/sub blocks)	1
600 to 899	3
900 to 1199	4
1200 to 1499	5
.....and so on	

### **2.13 Selection of hamlet groups/sub blocks:**

In case of large village/UFS block wherever hamlet-groups/sub-blocks have been formed, two hamlet-groups/sub-blocks are selected. The procedure to select the hg/sb is as follows:

- i) The hg/sb with maximum percentage share of population will always be selected and termed as hg/sb 1.
- ii) Second hg/sb will be selected from the remaining hgs/sbs by simple random sampling and termed as hg/sb 2.

Listing and selection of the households will be done independently in the two selected hamlet-groups/sub-blocks. In case hamlet-groups/sub-blocks is formed in a sample FSU, it is ensured that the hamlet-groups/sub-blocks formed are clearly identifiable in terms of physical landmarks. The FSU without hg/sb formation will be treated as sample hg/sb number 1.

**2.14 Listing of households:** After determining the hamlet-groups/sub-blocks i.e. areas to be considered for listing, all the

households in that area will be listed (including those found to be temporarily locked after ascertaining the temporariness of locking of households through local people). The hamlet-group/sub-block with sample hg/sb number 1 will be listed first and that with sample hg/sb number 2 will be listed next.

### **Formation of Second Stage Strata and allocation of households:**

**2.15** For canvassing the schedules, all the households listed in selected FSU/ hamlet-groups/ sub-blocks are to be stratified into four second stage strata (SSS) as given below:

The second-stage-strata in the rural and urban stratum will be formed based on the number of persons in a household aged 15 years and above. The four second-stage-strata (SSS) in the rural and urban strata are formed in the following order:

### **2.16 Allocation of households:**

The number of households to be surveyed (h) in each second stage stratum in the sample FSUs is as follows:

Second Stage Strata (SSS)	No. of members in the household aged 15 years & above
SSS1	1
SSS2	2-3
SSS3	4-5
SSS4	6 & more

SSS	without hg/sb formation		with hg/sb formation in both rural & urban strata	
	Rural	Urban	hg1/sb1	hg2/sb2
h1	1	1	1	1
h2	2	3	2	2
h3	4	4	2	2
h4	3	2	1	1
<b>Total</b>	<b>10</b>	<b>10</b>	<b>6</b>	<b>6</b>

### 2.17 Selection of Households:

From each Second Stage Strata the sample households are selected by simple random sampling without replacement.

### 2.18 Shortfall of households to be compensated:

Shortfall of households in the frame of any particular SSS will be compensated from the same SSS of the other hg/sb or from the other SSS of the same or other hg/sb where additional household(s) are available. The procedure is as follows:

Step 1: Allocate the required number of households to each SSS wherever possible and identify the SSS having shortfall.

Step 2: In case of hg/sb formation, compensate from the same SSS of the other hg/sb, if available. Otherwise, go to Step 3.

Step 3: Find the SSS where additional households are available following the priority order of SSS 1, SSS 2, SSS 3 & SSS 4 and compensate.

**2.19** The table given below may be useful for deciding the SSS from

which the compensation is to be made.

SSS having shortfall	priority order of SSS for
1	2, 3, 4
2	1, 3, 4
3	1, 2, 4
4	1, 2, 3

**2.20** If there is hg/sb formation, for each SSS as per priority order, compensation may be made from the hg/sb where shortfall occurs, failing which from other hg/sb and so on.

**2.21** For example, if shortfall is in SSS 3 of hg/sb 1, first try to compensate from SSS3 of hg/sb 2,

failing which try from SSS 1 of hg/sb 1, failing which try from SSS 1 of hg/sb 2. If the shortfall still remains then try from SSS 2 of hg/sb 1, failing which try from SSS 2 of hg/ sb 2. If the shortfall still remains then try from SSS 4 of hg/sb 1, failing which try from SSS 4 of hg/ sb 2.

### Estimation Procedure

t = subscript for t-th stratum

m = subscript for sub-sample (m =1, 2)

i = subscript for i-th FSU (village/panchayat ward/ UFS block)

d = subscript for a hamlet-group/ sub-block (d = 1, 2)

j = subscript for j-th second stage stratum in an FSU/hg/sb (j = 1,2,3,4)

k = subscript for k-th sample household under a particular second stage stratum within an FSU/ hg/sb

D = total number of hg's/ sb's formed in the sample FSU

D\* = 1 if D = 1

= D-1 for FSUs with D > 1

N = total number of FSUs in any urban stratum

Z = total size of a rural stratum

$z$  = size of selected sample village

$n$  = number of sample FSUs surveyed in a stratum

$H$  = total number of households listed in a second-stage stratum of an FSU  
/ hamlet-group or sub-block of sample FSU

$h$  = number of households surveyed in a second-stage stratum of an FSU /  
hamlet-group or sub-block of sample FSU

$x, y$  = observed value of characteristics  $x, y$  under estimation

$\bar{X}, \bar{Y}$  = estimate of population total  $X, Y$  for the characteristics  $x, y$

Under the above symbols,

$y_{tmidjk}$  = observed value of the characteristic  $y$  for the  $k$ -th household in the  
 $j$ -th second stage stratum of the  $d$ -th hg/ sb ( $d = 1, 2$ ) of the  $i$ -th FSU  
belonging to the  $m$ -th sub-sample for the  $t$ -th stratum.

### **Formulae for Estimation of Aggregates for a stratum in a district (rural & urban)**

#### **Listing Schedule 'A'**

**Rural stratum:** For estimating the number of households possessing a characteristic

$$\hat{Y} = \frac{Z}{n} \sum_{i=1}^n \frac{1}{z_i} \{y_{i1} + D_i^* y_{i2}\}$$

Where  $y_{i1}, y_{i2}$  are the total number of households possessing the characteristic  $y$  in hg's 1 & 2 of the  $i$ -th FSU respectively.

**Urban Stratum:** For estimating the number of households possessing a characteristic in the urban stratum of a district.

$$\hat{Y} = \frac{N}{n} \sum_{i=1}^n \{y_{i1} + D_i^* y_{i2}\}$$

Where  $y_{i1}, y_{i2}$  are the total number of households possessing the characteristic  $y$  in sub-blocks 1 & 2 of  $i$ -th FSU respectively.

**Schedule 'B':** (Employment – Unemployment Survey Schedule)

**Estimation formula for a rural stratum in a district:**

Rural:

$$\hat{Y} = \sum_{j=1}^4 \frac{Z}{n_j} \sum_{i=1}^{n_j} \frac{1}{z_i} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

**Estimation formula for an urban stratum in a District:**

$$\hat{Y} = \sum_{j=1}^4 \frac{N}{n_j} \sum_{i=1}^{n_j} \left\{ \frac{H_{i1j}}{h_{i1j}} \sum_{k=1}^{h_{i1j}} y_{i1jk} + D_i^* \frac{H_{i2j}}{h_{i2j}} \sum_{k=1}^{h_{i2j}} y_{i2jk} \right\}$$

**Overall Estimate for Aggregates:**

Overall estimate for aggregates for a stratum ( $\hat{Y}_t$ ) based on two sub-samples is obtained as:

$$\hat{Y}_t = \frac{1}{2} \sum_{m=1}^2 \hat{Y}_{tm}$$

**Overall Estimate of Aggregates at State/UT/all-India level:**

The overall estimate  $\hat{Y}$  at the State/ UT/ all-India level is obtained by summing the stratum estimates  $\hat{Y}_t$  over all strata belonging to the State/ UT/ All-India.

**Table (A1): Number of villages/UFS blocks allocated and actually surveyed for each State/UT****Rural+Urban**

**Note:** 1. Population and Percentage decadal change in population aged 15 years and above were calculated using Table C13 of Census 2001 and 2011.

2. For any category of persons of any State/UT/All-India, Projected population as on 1st March 2014 has been derived using the formula.  $A=A1*[1+(R/100)]^{(36/120)}$ , where A1 is the census population as on 1st March 2011, R is the percentage decadal change in population between 2001 and 2011 and A is the projected population as on 1st March 2014.

Table (A4): Census Population as on 1st March 2011, percentage decadal change in population of aged 15 years and above between census 2001 and 2011 and projected population as on 1st March 2014 for each State/UT and All-India.

Name of State/UT/All India	Female					
	Rural			Urban		
	Census Population as on 1st March 2011	Percentage Decadal Change in Population Between Census 2001 and 2011 (15 years & above)	Projected Population as on 1st March 2014	Census Population as on 1st March 2011	Percentage Decadal Change in Population Between Census 2001 and 2011 (15 years & above)	Projected Population as on 1st March 2014
